Typing is tactile & responsive With a generous 2mm of key travel, typing feels as tactile and responsive as any of the best laptop keyboards.. For White, turn all the way to the left, or all the way to the right — passing through a rainbow of colors in between.. Dial it back a little further, and you have 100% Yellow (0% Blue) Dial it back further still, and you get 100% Red — which is the color that least impacts sleep patterns. The backlight on this keyboard was SPECIFICALLY designed to address that problem.. Turning the Color Dial all the way to the left or right gets you White (which is 100% Red, Green, and Blue).. BUT when you turn the Dial back, it preferentially reduces the BLUE component of White, resulting in softer Whites, that are more Yellow (and better at night).. It's the ultimate in simplicity & flexibility Nightly whites Too much Blue-light exposure at night is known to negatively impact your melatonin levels.. Canon drivers for mac This can shift your body's natural time clock — leading to poor sleep and various other health issues.. 7 Note that its digital signature is not for Yosemite so Gatekeeper will stop you.. The Matias Wired Aluminum Keyboard with RGB Backlight is available for \$99 (US) or 119€ (including VAT) from Matias and authorized resellers / distributors worldwide. e828bfe731 [Paragon Software For Mac Free Download](#)
